SENATE REPORT

WASHINGTON - Senator John Stennis, chairman of the Senate Preparedness Investigating Subcommittee, received word of confirmation from the House and Senate alike, when he gave the Senate a "progress report" concerning the subcommittee's activities.

The subcommittee, created by the Senate in 1958, has been active in the field of nuclear weapons, and Stennis has been particularly active in the field of nuclear weapons.

Stennis' report to the Senate outlined the progress of the subcommittee's work, and he said that the subcommittee has been very active in the field of nuclear weapons.

ARMY SERVICEMEN IN SERVICE

24th Infantry Div. Germany (AHCN) - Army Staff Sergeant Donald H. Peterson, 31, whose wife Shirley lives in Pearlman, Miss., is participating with other members of the 24th Infantry Division in an air transportation exercise in Germany, beginning Sept. 27.

The exercise is designed to perfect air movement techniques with a specific emphasis on air mobility of brigade task forces.

Sergeant Peterson, a wire chief in Headquarters Battery, 1st Battalion of the division's 13th Artillery near Augsburg, Germany, entered the Army in January 1954 and arrived overseas on this tour of duty in March 1964.

The sergeant was graduated from Bay St. Louis High School in 1952. His mother, Mrs. Eva C. Peterson, lives in Waveland.

USS OKINAWA (FHTNC) - Marine Sergeant Earl C. Bennett, son of Mrs. Alden Bailey of Pearlman, Miss., is a member of Medium Marine Helicopter Squadron 261.

The squadron recently participated in carrier qualifications aboard the amphibious assault ship USS Okinawa. The exercise was held to illustrate current methods of landing transport helicopters aboard a flight deck.

CHANCERY SUMMONS

NO. 9493

THE STATE OF MISSISSIPPI
To the unknown heirs at Law or Legatees of Samuel White, deceased. The unknown heirs at Law or Legatees of Luther F. Russ, deceased. The unknown heirs at Law or Legatees of Hattie Colman, deceased. The unknown heirs at Law or Legatees of Minerva Armstrong, deceased. The unknown heirs at Law or Legatees of Minerva Byrd, deceased. Charles Toomer, if alive, and if dead, his unknown heirs at Law or Legatees, any and all persons having or claiming any right, title or interest in and to the following described land:

That certain piece of property situated in Hancock County, Mississippi, described as follows, to-wit: Commencing at the North-east corner of Section 15, Township 9, South Range 16 West; thence running West 1320 feet to a point at a place of beginning; thence West 680 feet to a point; thence South 680 feet to a point; thence East 680 feet to a point; thence North 680 feet to the place of beginning, and being located in Section 15, Township 9, S. Range 16 West.

You are summoned to appear before the Chancery Court of the County of Hancock, in said State on the Fourth Monday of October A. D. 1964 to defend his suit No. 9493 in said Court of J. Roland Weston and Joe B. Burrow.

The same being a suit to quiet and confirm complainant's title to said land above described wherein you are a defendant.

D. 1964 (SFAL) MARIE E. QUINTINI Chancery Clerk

NEW ORLEANS, LA. - Work men complete installation of a 40-foot diameter National Aeronautics and Space Administration emblem on the Saturn V booster vertical assembly building at NASA's Michoud Operations here. The red, white and blue emblem, located 37 feet from the top of the 215-foot tall structure, was built by Industrial Signs, Inc. of New Orleans. A division of the NASA Marshall Space Flight Center at Huntsville, Ala., Michoud is the production site of the giant Saturn I, Saturn IB and Saturn V first stages to be used in the Apollo manned lunar landing program.

FEDERAL GAS TAX REFUND FOR NON-HIGHWAY AND TRANSIT USERS

J. G. Martin, Jr., District Director of Internal Revenue for the Jackson District, reminds taxpayers who use gasoline for non-highway purposes that they may have a tax refund due them. In general, a refund may be obtained of the two cents a gallon Federal tax paid on motor fuels when these fuels are used:

(1) For purposes other than in registered highway vehicles and (2) by certain transit systems.

Gasoline which is used for purposes other than as a fuel in a highway vehicle may qualify for the 2-cent refund. Examples: Gasoline used in cleaning tools, machinery, etc., gasoline used in motor boats, aircraft, fork-lift trucks, bulldozers, earth movers, etc.

Refunds may also be made on gasoline used in a highway vehicle if, at the time of such use, the vehicle is not registered and is not required to be registered under the laws of the state in which it is operated or situated.

This might include gasoline used in autos and trucks operating off the highway in connection with construction, mining, or timbering projects if they meet the above requirements. Farmers are entitled to claim refunds each year for the Federal excise tax on gasoline used on a farm for farming purposes.

Claims for refund must be postmarked no later than September 30, 1964, for the 12-month period, July 1, 1963 through June 30, 1964.

Publication No. 378 (Rev. 6-44), "Federal Gas Tax Refund for Non-Highway and Transit Users", furnishes more detailed information on this subject. It is available upon request from local Internal Revenue Service offices.

SON OF LOCAL RESIDENT DIED AT PASS HOME

Letter Clarence Garriga Sr., 51, son of Mrs. Charles Garriga of Bay St. Louis died unexpectedly about 4:30 p.m. Saturday at his residence, 231 Davis Avenue, Pass Christian. He had been in ill health for several months.

Mr. Garriga, a native of Hancock County, was Harrison County Beat 3 county patrolman for 13 years. He also served as a city policeman in Pass Christian.

He resided in Pass Christian for the past 32 years and was a member of St. Paul's Catholic Church.

In addition to his mother, Mr. Garriga is survived by his widow, Mrs. Martha Wise Garriga, Pass Christian; two daughters, Mrs. Max Westhoff, Ocean Springs and Kelly Ann Garriga, Pass Christian; a son, Lester C. Garriga Jr., Pass Christian; a step-son, Elwood Steuber Jr., Kansas; a brother, Police Chief Lathan Garriga, Bay St. Louis; a sister, Mrs. Irma Weinacker, Mobile; and two grandchildren, Michael and Lori Wuesthoff.

Funeral services were held from Riemann Funeral Home Chapel, Pass Christian, at 3 p.m. Sunday with the Rev. John Egan, assistant pastor, St. Paul's Church officiating. Interment was in Live Oak Cemetery.

Pallbearers were Nick French, Emmett McCallister, Shannon Pickich, George Duboussin, W. G. Simpson and Melvin Garriga.

NAMED TROOP ORGANIZER

Mrs. Jean Wood was named troop organizer of the Bay St. Louis Neighborhood Girl Scouts at an organizational meeting Wednesday.

CUTTING IMPROVES HARDWOOD FOREST

STATE COLLEGE, MISS. - A long-range research project in the Delta is showing how improvement cutting can increase growth of hardwood trees and cause forests to develop into acceptable commercial stands.

R. M. Krinard and R. L. Johnson, USDA foresters working in cooperation with the Delta Branch Experiment Station at Stoneville, recently summarized results of a 20-year study at the Delta Experimental Forest. When the study started, the stand was typical of

YOUR SAVINGS BOND QUIZ

Question: I have a rather large number of Series "E" bonds that I purchased in 1953 and 1954. When will these bonds mature and what is the interest rate I think it was 3 percent to begin with.

Answer: In all probability, your bonds have passed their first maturity date and now are in the 10-year extension period which they were accorded. Bonds issued at that time had an original maturity period of nine years and eight months. The interest rate on your bonds was increased effective June 1, 1959, for their remaining period to maturity, and in the extension period they are drawing 3 3/4 percent, compounded semi-annually.

Question: My son will have enough Savings Stamps to buy a bond in a few weeks. Where do we turn them in for a bond?

Answer: Any bond issuing agent (bank) will accept Savings Stamps presented in payment for a Savings Bond Post Office does not issue Savings Bonds but will redeem stamps for cash. The stamps should not be presented loose, but affixed in an album.

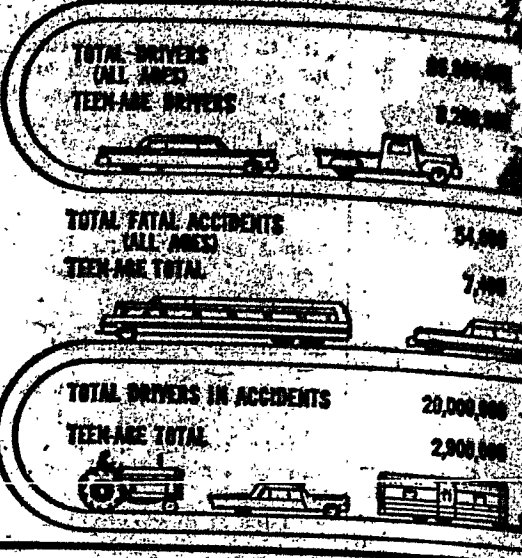

Question: I understand that Savings Bonds cannot be pledged as collateral, but can they be used as security for performance of an obligation?

Answer: No, and for the very same reason. Savings Bonds can be cashed only by the person in whose name they are registered (except, of course, in isolated cases of guardians or custodians legally authorized to act for the bond owner.) This is another built-in safety feature for owners of bonds.

much of the second growth timber in the Delta. It consisted of an uneven-aged mixture of hardwoods that had been repeatedly logged for the best trees, cut over for fuelwood, and burned frequently since the original logging about 1913.

The objective of the cuttings was to eliminate culls and reduce the number of trees of undesirable species, thus giving trees of good form and species room to grow.

aim to curb teen-age

Motor vehicle accidents are the leading cause of death for persons under 25. Young drivers have the highest death rate of any other driver age group. These statistics are the concern of 4-H boys and girls in the National 4-H Automotive program conducted by the Department of Agriculture.

The Firestone Tire & Rubber Company sponsors the program, providing awards, educational literature and other aids. Also lending support are the National 4-H Service Committee, the Automotive Safety Foundation and the National Safety Council.

Local club leaders urge them to complete projects and re-enroll to obtain the benefits of the three-unit course. The first two units are designed for the pre-driver. The program

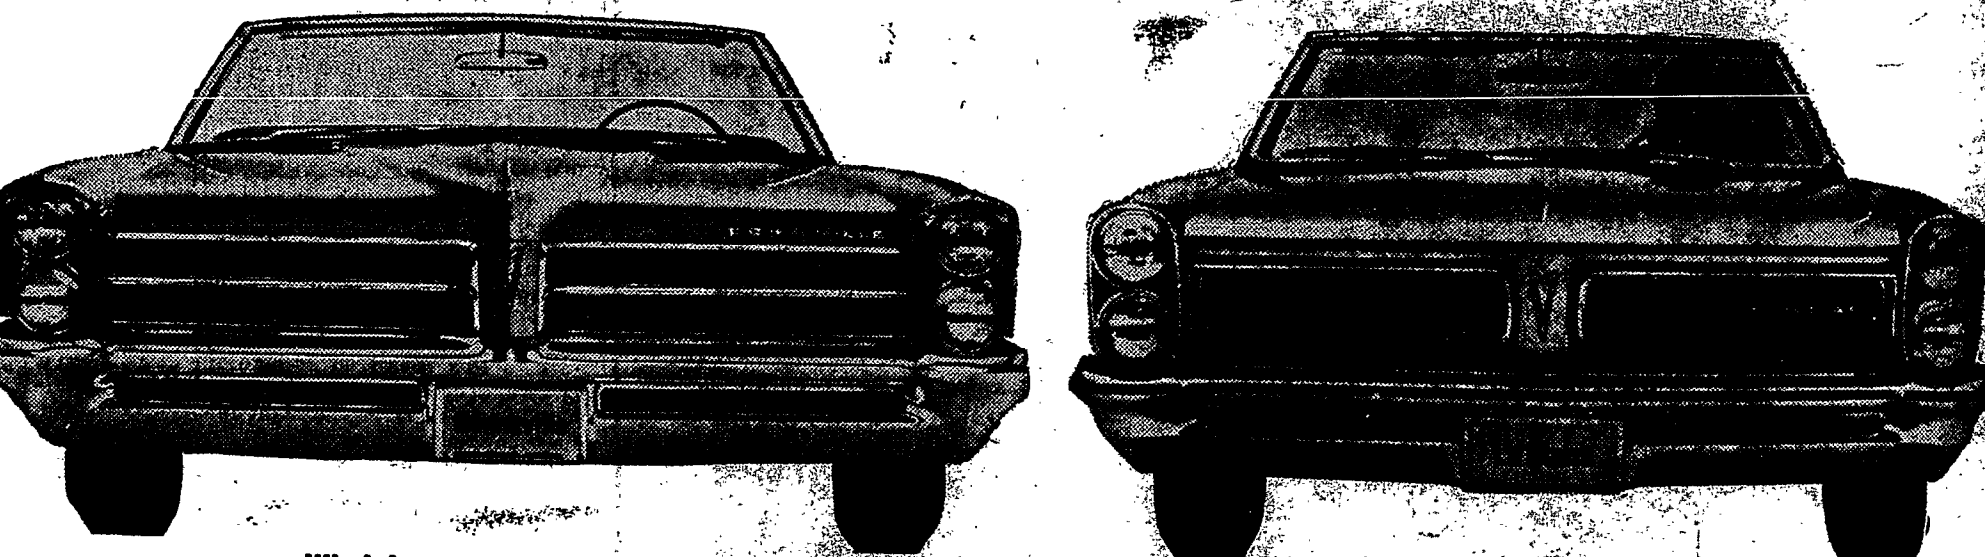

Two plots were cut, one more heavily than the other, and a third plot was left uncut as a check.

Now, the research men report the plots that were cut have more pole size trees and more saw timber than the check plot. Undeveloped growing stock averages less than 800 board feet per acre on the cut plots and 3,600 board feet on the uncut plot. About 20 percent of the saw-log volume on the check plots was factory grade 1 compared to less than 10 percent on the check area.

A complete report of the results of the research is published in the September issue of Mississippi Farm Research available on request from the Experiment Station at State College.

Today is '65 Pontiac Day. 1965: The year of the Quick Wide-Tracks

What do we mean by "quick"? Just this: A new all-over Pontiac Pontiac offering a new Turbo Hydra-Matic—the silkiest, swiftest-shifting automatic transmission you ever touched a toe to; eager new Trophy V-8 power; new steering agility; a surer-footed Wide-Track ride. And a new Pontiac Tempest that's become even more of a Pontiac with new style, new length and Pontiac-quick reflexes to match. You never knew cars could be so beautiful, and so keenly alert to your touch. This is your year to drive a Wide-Track—quick!

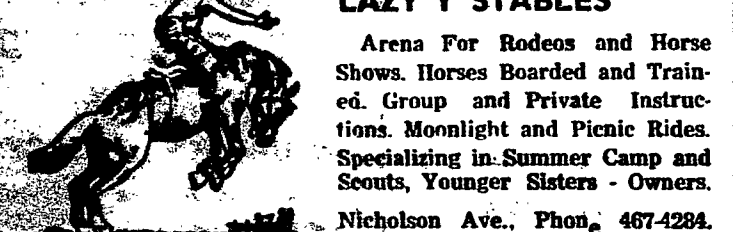

'65 Pontiac Pontiac How does the success car outdo itself for 1965? Beautifully, just beautifully. But this Pontiac has no intention of getting by on looks alone, though it could. So there's new, quietness. Pontiac says: A success leads to another.

'65 Pontiac Tempest Tempest's even more of a Pontiac now, and what more could a car be than that? The '65 Tempest looks like a Pontiac, as you can see. Rides like a Pontiac on Wide-Track. Goes like a Pontiac, too: a 140-hp six is standard. Or you can get a quick V-8, up to 225 hp. You'll wonder how we can keep the price so low on so much car.

STATE TAP LEADERS - Two high school seniors, Ed Decker of Laurel and Caroline Barbour of Yazoo City, have been named state champions for the Teen Age Program (TAP) for the 1963-64 season. Dr. A. L. Gray, state chairman for the annual March of Dimes fund appeal, made the announcement. Caroline will be in charge of teen activities in North Mississippi counties and Ed will serve the southern part of the state.

STANISLAUS BLANKS BEN FRANKLIN

Coach Billy Murphy's St. Stanislaus Rockchaws racked up their second straight impressive football victory Friday night at Rockchaw Stadium by blanking Ben Franklin High of New Orleans 28-0.

The undefeated Rockchaws, who last week beat Shaw High of New Orleans 41-6 in their opener scored 15 points in the first quarter of Friday's contest, then added single touchdowns in the second and third quarters to sew up the triumph.

Fullback Ed Boasberg raced 18 yards for the initial touchdown. Later in the first quarter halfback Rusty Judlin broke away on a 70-yard scoring dash.

Paul Weaver missed his first two extra point attempts from placement but made up for it with a 25-yard first period field goal.

Judlin got his second touchdown in the second quarter when he again broke away from Ben Franklin defenders and raced 65 yards to paydirt. Weaver kicked the extra point to give the Rockchaws a 22-0 halftime advantage.

The final St. Stanislaus touchdown came in the third period on a 32-yard scoring dash by Dale Burke.

Next week the Rockchaws

BAY TIGERS DOWN PEARL RIVER 12-0

The Bay High Tigers recorded their third win in as many outings with a 12-0 decision over Pearl River Central in a Gulf Coast Conference football game Friday night at Carriere.

After a scoreless first half battle, Coach Lance Lumpkin's Tigers struck for single touchdowns in the final two periods.

Mike Strong capped a 78-yard drive in the third period by going over from five yards out.

In the final period, Danny Krankey passed 30 yards to Strong for a touchdown.

Larry Johnson missed both extra point tries from placement.

Next Friday Bay High will entertain Hancock North Central while Pearl River Central will host Harrison Central.

Scores by quarters:

Bay High 0 0 6 12

Pearl River 0 0 0 0-0

Scoring summary: Bay High touchdowns, Strong, 2, five yard run, 30 yard pass from Krankey.

travel to Hahnville, La., for a Friday night encounter.

Stanislaus 15 7 6 0-28

STENNIS SAYS DECISION ENCOURAGES U. S. PUBLIC

Those of us who believe in the preservation of a constitutional government in this country are greatly encouraged by the decision of the three-judge Federal Court in Birmingham recently.

According to newspaper reports, that decision held the provisions of the public accommodations section of the Civil Rights Act unconstitutional as applied to a restaurant not engaged in interstate commerce.

During the long debates in the Senate against the civil rights bill, I pointed out that many sections of the bill were unconstitutional. I opposed the entire bill, as did a number of other Senators.

The attempt of the Federal government to dictate to a restaurant owner whom he may serve, regardless of his wishes, is an unreasonable and unjustified interference with private property and the right of a person to use his property and utilize the fruits of his labor in his own way. These individual rights are the very essence of the free enterprise system which has made our country the greatest nation in the world.

I strongly believe in this principle, and it makes no difference whether the restaurant is engaged in interstate commerce. But the Congress, in enacting the public accommodations section of the Civil Rights Act, attempted to base it on the provisions of the interstate commerce clause.

However, the Congress went far afield in its attempt to define interstate commerce and included

Victor J. Frankiewicz (left), 402 Felicly, Bay St. Louis, receives a service pin from William C. Fortune, Manager of Mississippi Test Operations, to commemorate his first anniversary with the National Aeronautics and Space Administration's Hancock County test facility. Frankiewicz, who retired from the Air Force after 23 years of service, is a member of the Resources Management Division at MTO.

every restaurant or similar business who serves any customers engaged in interstate travel.

In issuing its ruling, the three-judge Court in Birmingham said that if Congress had the "naked power to do what it has attempted in the Civil Rights Act, there is no facet of human behavior which it may not control."

Those of us who opposed the civil rights bill pointed out time and time again that the bill constitutes an unwarranted departure from the Constitution and legal precedents, and the three-judge Court wisely upheld this argument.

That Court ruling from Birmingham is encouraging and I sincerely hope the decision will be upheld when it reaches the U. S. Supreme Court.

TENTH BIRTHDAY

Stephen Scianna celebrated his 10th birthday Saturday with a party at the home of his parents Mr. and Mrs. Charles Scianna.

Following games and refreshments, Stephen and his guests enjoyed a movie at the Star Theatre.

BAY DUPLICATORS HOLD SESSION

The Bay St. Louis Duplicators held their regular session last Friday at the Bay-Waveland Garden Center. Mrs. Jo Jinks directed a five-table Howell Movement.

First place honors were taken by L. Harrington and L. Nybo; second Mrs. L. Glanville and Mrs. J. Jinks; third, Mrs. G. Gex, and Mrs. Sunday.

78TH BIRTHDAY

Anna Bernard, 78, celebrated her 78th birthday with her family Sunday.

now! the beautiful shapes for '65

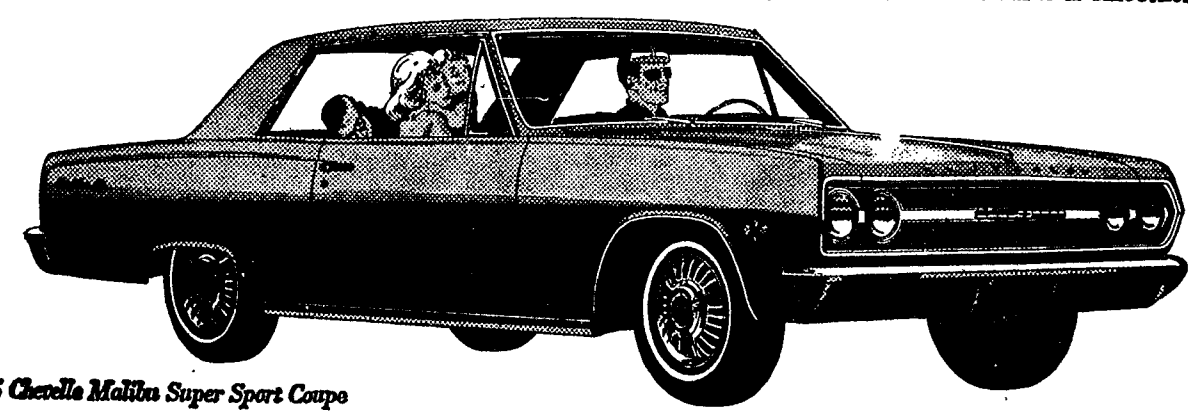

'65 Chevrolet Impala Sport Sedan

Chevrolet Impala '65

It's longer, lower, wider—with comforts that'll have many an expensive car wondering why it didn't think of them first. More shoulder room, more leg room up front. Curved side windows, an

instrument panel that's a conversation piece. In fact, just about everything's new right down to the road. And even that'll seem newer because the Jet-smooth ride is smoother than ever.

'65 Chevrolet Malibu Super Sport Coupe

Chevelle Malibu '65

Here's all that made Chevelle America's most popular new-sized car—plus some new surprises. Like those cleaner, bolder lines. Like the silky way its new ride skims over the choppiest roads. Like

V8 power that'll make you think we stole some of Corvette's stuff—which we did. All told, five engines are available from a quister six to a V8 that comes on 300 horses strong.

'65 Chevy II Nova 4-Door Sedan

Chevy II Nova '65

It may be the expensive-looking thrifty car you've laid eyes on. But thrifty it is. The big difference being that Chevy II's marvelous mechanical efficiency now wears a debonair new look. And

offers a new range of engines, including a new 300-hp V8. You could get the idea that saving you money was the last thing we had in mind—if it weren't for that price sticker on the window.

New top-of-the-line Corvair Corsa Sport Coupe

Corvair Corsa '65

How's this for sport with an international flair! The longer, wider design gives all closed models a hardtop roof, along with more shoulder and entrance room. And to go with the racier look,

there's up to 180 hp available in the new Corsa series, up to 140 hp in the Monza and 200 in the Monza. Also a flatter riding independent suspension, more responsive steering and a wider road stance.

Social Security

A severely handicapped worker who puts off making his claim for social security payments risks losing all or part of the social security payments that may be due him, says the information given today by Waymon D. Sewell, social security district manager in Gulfport, Miss.

Disability payments under the program may be made retroactive for a maximum of 12 months before the month a claim is filed, said Sewell. He went on to say that no disability payments are made for the first 6 months a worker is disabled.

To get disability payments, a worker must meet a special disability work requirement of the social security law. This requirement, Sewell explained, is that the worker have 5 years of work under social security in the 10-year period before he is disabled. A claim for benefits must be made soon after the disability begins.

In some instances, Sewell said, a worker who delays his claim more than 18 months after he is

disabled could lose out completely on disability payments. Any worker who is too disabled to work and whose condition is not obvious to temporary should get in touch with the office at 1022 32nd Ave. in Gulfport, Mississippi without delay. "Only by doing so," concluded Sewell, "can the worker be sure he will not lose social security payments which are rightfully his."

Have you ever waited to receive some money only to find out it would come much later than expected? You were disappointed. This sometimes happens to people who look forward to their first social security check. It may be delayed because they didn't get in touch with their social security office soon enough. What is "soon enough" to speed up your first check? A call at the social security office 2 or 3 months before retirement is an excellent way to avoid disappointment. The social security office for this area is located at 1022 32nd Avenue in Gulfport, Mississippi.

NASA News..

HUNTSVILLE, ALA. - The NASA-Marshall Space Flight Center has awarded a \$2.5 million contract to Hamilton Standard, a division of United Aircraft Corp., for manufacturing eight propellant servicing trailers.

The trailers will be used at Cape Kennedy, Fla., to fuel auxiliary propulsion systems for attitude control on the S-IVB, second stage of the Saturn IB rocket and third stage of the Saturn V rocket. They also will be used to purge and flush the auxiliary propellant system and lines on the supporting gentry.

Hamilton Standard will manufacture four sets of servicing trailers. Each set will have a trailer for handling fuel and another for the oxidizer-monethyl hydrazine and nitrogen tetroxide. The trailers will be delivered to Cape Kennedy. The firm will build the trailers at its ground support equipment department at Windsor Locks, Conn.

HUNTSVILLE, ALA. - The ninth of a series of ten Requests for Proposals (RFP) for engineering and technical support of NASA's Marshall Space Flight Center has been issued.

The latest RFP was for support to the Propulsion and Vehicle Engineering Laboratory. The RFPs were mailed to 116 firms most likely to be interested in providing support to the laboratory.

Only one support RFP remains to be issued. It is expected to be in the mail within a few days. It calls for proposals for support to the Research Projects Laboratory.

RFPs have been issued one or two a week and have been published in "Commerce Daily." The RFPs are available to all firms interested in submitting bids.

A pre-proposal conference on the latest RFP will be held at the Marshall Center September 15. Due date for proposals is October 21.

RFPs were issued previously for proposals on support to the

Test Laboratory, Facilities and Design Office, Quality Assurance and Reliability Laboratory, Management Services Office, Technical Services Office, Aero-Astrodynamics Laboratory, Manufacturing Engineering Laboratory and Astronautics Laboratory.

NASA includes with each RFP a document which outlines NASA policy aimed at preventing a conflict of interest in connection with support contracts.

In reviewing proposals, the source evaluation board at Marshall will take into consideration possible conflicts of interest resulting from support of several laboratories by the same contractor. This would tend to preclude multiple support contracts to a single firm. Criteria for evaluating proposals are set forth in each RFP.

The issuance of RFPs are spaced in such a manner that contractors will have time to study each and prepare proposals. There will be one week in which each contractor will have all RFPs in his hands to allow him to consider them and bid on the ones for which he feels he is best qualified.

Thrill and Patriotism go hand-in-hand for youngsters who buy U. S. Savings Bonds, available at many schools and all post offices at 10 cents, 25 cents and up.

The \$50 Series "E" U. S. Savings Bond (costing only \$37.50) is becoming increasingly popular with Payroll Savers. Only \$9 weekly buys One-A-Month comfortably.

NEW YORK - America's farms have become so mechanized, thanks largely to abundant supplies of low-cost fuels - that this year's Department of Agriculture census, for the first time in history, will not seek information about the number of horses and mules used in farming, Oil Facts reports.

At one time an estimated 25 million horses and mules provided muscle energy on the nation's farms. They have now been all but replaced by some 4.7 million tractors, 2.8 million trucks and 3.6 million automobiles.

VOLUNTEER HELP WANTED

Ladies to help at Retarded Children's School. For more information, call: HO-77057 or HO-77407.

NEW ORLEANS, La. - A cross-shaped baffle as it will appear in the first stage of the National Aeronautics and Space Administration's Saturn V space vehicle, looms over the head of an employee at the NASA Michoud Operations here. The baffle fits into the bottom of the liquid oxygen and fuel tanks to prevent the liquid from swirling as it pours into the outlets to the engines. The installation is part of a full-scale engineering mockup of the 7.5 million pound thrust booster. Ten of the giant stages will be built at Michoud by the Boeing Co., Launch Systems Branch.

LIVESTOCK TO BE ONE OF FAIR'S MAIN ATTRACTIONS

Again this year, the Livestock Department promises to be one of the main attractions at the Mississippi State Fair, to be held in Jackson, October 12-17. E. E. Grissom, general superintendent of the department and ex-convict animal husbandry leader at Mississippi State University, said that the livestock building on the east side of the lives'ock arena makes for some of the best facilities anywhere in the South.

Top specimens of beef and dairy cattle, swine, sheep, poultry and rabbits will be exhibited as in past years.

Because of the increasingly important role beef cattle have played in the state's economic progress, particular attention will be devoted to the fine animals entered in the beef cattle and junior livestock divisions of this department.

Specific rules and regulations for entering livestock in the fair's competition are outlined in the State Fair catalog. Copies of the catalog can be obtained from N. S. Hand, Secretary of the State Fair, Jackson.

E. E. Grissom will again serve as superintendent of the beef cattle division and will be assisted by R. O. Buckley and W. M. Swoope of State College and C. C. Stone of Jackson. Dr. L. S. Pope, Oklahoma State University, will judge the beef cattle. Premiums in this division total \$6,300.

The judging schedule for the beef cattle is: Tuesday, October 13, 8:30 a. m., judging baby beefs and junior beef breeding cattle; Wednesday, October 14, 8:00 a. m., judging Angus cattle (open show); 1:00 p. m., judging Hereford cattle (open show); Friday, October 15, 10:00 a. m., judging Santa Gertrudis cattle and junior livestock judging contest.

16, 10:00 a. m., judging Santa Gertrudis cattle and junior livestock judging contest.

All animals must be in place by 11:00 a. m., Monday, October 12, and no animal can be removed from the fair grounds prior to 6:00 p. m. Saturday, October 17, according to division rules as stated in the Fair catalog.

The American Hereford Association will add 33 1/3 percent of the prizes of \$4.00 or more offered for registered Hereford breeding cattle in the adult breeding show. Twenty-four lots will be presented in the Hereford competition, most of them offering four or more prizes.

In the Aberdeen-Angus competition, some 37 lots are available in the classification in which exhibitors will compete. The all-Aberdeen-Angus entries are subject to the provisions of a rule of the American Angus Association entitled "Eligibility, Conformation and Structure of Animals Presented for Exhibition."

The American Shorthorn Breeders Association will pay to the exhibitor of Shorthorn cattle an additional 10 percent of each individual premium paid by the Fair amounting to \$5.00 or more. Thirty-two lots will compete in this class.

Some 31 lots are provided for the Santa Gertrudis competition and all animals to be eligible for this show must be approved by a committee designated by the Santa Gertrudis Breeders International. A selected exhibit of this breed will be shown by the Delta Santa Gertrudis Association, also.

JUNIOR LIVESTOCK

H. B. Hedgepeth will again serve as superintendent of the Junior Livestock division. He will be assisted by Monroe McElveen, Liberty, Troy V. Majure, Utica and

HOME AGENT'S NOTES

The "tenderizer" in meat tenderizers is a natural plant enzyme called papain, which is obtained from the papaya fruit.

It is generally recognized as safe for use on foods which are to be cooked. So put aside your fears that a tenderizer might hurt the stomach of a person who might eat tenderized meat.

TABLE CENTERPIECE

Whatever centerpiece you select for your dining table, don't ever make it so high that it obstructs the view of those seated at the table. This rule is true whether your arrangement is flowers, fruit, or other objects.

If you use candles, however, they should be tall enough so that the flame is above eye level.

DAIRY SOUR CREAM

Stir dairy sour cream into sauces and gravies at the end of cooking, adding only a tablespoon at a time. Remember to heat sour cream gently; never boil.

LINTLESS LAUNDRY

Shaking clothing to remove loose lint before laundering will help avoid lint pick-up during laundering.

You will also want to be sure to turn corduroys, jeans, dark-colored shirts and other pieces inside out. Don't ever wash these pieces that pick up lint easily with such linty items as tufted bedspreads.

Be sure you clean the lint-removal filter, screen or trap of your washing machine regularly to keep lint loosened during laundering from being redeposited on other clothes.

Wind will blow lint from clothes hung for line drying. In a dryer, lint is collected and disposed of in traps. Be sure to empty the lint trap regularly, because clogging lint reduces dryer efficiency. It is also a fire hazard.

SAFETY WITH AEROSOL CANS

As you use household cleaners, insecticides, paint or other materials in aerosol cans, be sure

Glenn See, Clinton.

In the Junior Livestock division each exhibitor is limited to two entries in each lot. Age of exhibitors is restricted to 10 to 20 years.

A committee appointed by the livestock superintendent at the beginning of the junior beef cattle show will select individuals who may come back and compete for showmanship awards.

DAIRY ROYALTY: Pretty, vivacious, Grace Strickland of Clay County is crowned Mississippi Dairy Princess by Miss Betty Lou Stuart, current Princess of Noxubee County, Annette Brent, 1st alternate, Copiah County; Miss Stuart, Paula Haried, 2nd alternate, Clay County; and Judy Haygood, Miss Congeniality, Lee County. The crowning occurred at the annual Mississippi Dairy Princess contest, sponsored by the American Dairy Association.

you treat them with the caution they should have. Keep aerosols out of reach of children. Store them away from heat and don't discard such a container in a fire. The gas inside can expand and cause the container to burst.

Never try to puncture the can. When you discard it, open the release valve until all the gas is exhausted. If for any reason the can is rusted or cracked, release the gas at once and get rid of the container.

Can I use coffee cans for freezing? Several of you have been asking this question.

Yes, you can use them, the nutrition specialists say. But they point out several disadvantages of using the cans. One, tin cans may rust. Two, round containers take up more freezer space than square containers. And three, tin will discolor red foods, which need enameled cans to protect their color.

Because of the danger of rust, you will find it best to store dry foods such as shelled pecans, peanuts and baked cookies in the cans. Be sure the cans have been thoroughly washed, scalded and dried. Seal the edges with freezer tape to keep out the air, unless the can has a plastic "snap-on" lid.

CHARCOAL-BROILED STEAKS AND CANCER

Many of you may have seen the news story suggesting a possible link between charcoal broiled steaks and cancer.

The American Medical Association

soon afterwards sent out a release stating that no ill effects resulting from charcoal broiled food have been reported in man. The authority for this statement was Dr. Philip L. White, secretary of the American Medical Association Council on Foods and Nutrition.

The smoke that arises when drippings hit live charcoal used in outdoor grills is primarily from incompletely combusted fat, Dr. White explained. The same thing happens when frying fat begins to smoke when overheated.

"It has been shown that fat, which is partially decomposed by heat, produces substances suspected of being hazardous," Dr. White said. "However, no incidences of harm traceable to food have been reported in man. For that matter, research with appropriate animals likewise has failed to demonstrate any hazards."

He suggests that you will assure a more pleasant atmosphere for barbecuing if you avoid the possibility of fat combustion as much as possible. To do this, cook the meat by the heat from the coals, not by fire. Use water to extinguish quickly any fires. Space coals so not two touch and adequate room is provided for fat to drip without coming in contact with the coals. Ideally, a drip pan should be used.

This article didn't mention it, but some folks have found a child's toy water pistol is a good gadget to use to put out any flames when you are barbecuing.

WE SALUTE TOMORROW'S LEADERS ♦ SEPT. 26-OCT. 3

national 4-H club week

Our youth today possess many of the necessary qualities for leadership. These qualities must be developed and refined, however, if our young people are to assume the reins of business, government and community life of tomorrow. Developing boys and girls for roles of responsibility is a part

of our American tradition... and for this reason our company is especially proud to sponsor the 4-H Junior Leadership Program. By working with the State Agricultural Extension service in this way, we believe we are helping to build an even better America for the future.

Wrap yourself in wall-to-wall warmth with Standard Heating Oil!

Warm rooms and hallways... floors, walls, and corners... wall to wall! You can enjoy this kind of beautiful comfort all winter long with a well-built house that's supplied with Standard Heating Oil. Odorless. Clean-burning. Standard Heating Oil costs no more... gives most for your money! Call your Standard Oil Man today!

We take better care of your comfort. A. J. SCAPION, Agent, Bay St. Louis, Mississippi
